Portfolio: https://orcunsarmis.github.io/Portfolio-/| GitHub: https://github.com/orcunSarmis

Full-stack web developer with a Certificate IV in Programming from Upskilled and currently participating in a 6-month Coding Bootcamp with the University of Adelaide. I have developed skills in JavaScript, CSS and HTML, as well as jQuery, NodeJS, ExpressJS, React, Web-APIs, Third-Party-APIs and Server-Sid-APIs. I have also worked with .Net, C#, Xamarin, as well as SQL and NoSQL database, following object-oriented and agile methodology principles. I am recognised for my attention to details and problem-solving skills. In a recent JavaScript project, I worked on server-side APIs to create a movie search database. Using HTML, CSS and JavaScript, I also worked on a password generator and a weather dashboard. In each of these projects, I focused on developing an engaging user experience and quality code whilst ensuring compliance with accessibility standards. I have also had the opportunity to work on the development of Windows form and Android Mobile Form applications. I am passionate about learning and constantly building on my skills to deliver the best possible user experience and quality projects. Highly motivated and fast-learner, I am excited to join a team of web developers to deliver robust web experiences.

TECHNICAL SKILLS

LANGUAGES: JavaScript, HTML, CSS, jQuery, Node.js, Express.js, ORM, MVC, React, ,MongoDB, API's, XHTML, XML, SQL/NoSQL, TSQL, GitHub branching strategy

PROJECTS

BARTERING PLATFORM,
Development of a bartering platform where users can trade services, knowledge and skills. The applications follows the MVC paradigm using Handlebars.js, sequelize ORM and the express-session npm package for authentication.
Deployed Application: https://warm-citadel-17427.herokuapp.com/signin
Github: https://github.com/orcunSarmis/sklhub

TECH BLOG,
CMS-style blog site, where developers can publish blog posts and comments on their peers'. It follows the MVC paradigm in its architectural structure, using Handlebars.js as the templating language, Sequelize as the ORM, and the express-session npm package for authentication.
Deployed Application: https://fast-ocean-21178.herokuapp.com/
Github: https://github.com/orcunSarmis/Tech_Blog

MOVIE SEARCH API,
Creation of an online database from OMDB's API that gives users access to information about thousands of movies using HTML, CSS, Javascript, Orbit CSS to create an engaging user experience.
Deployed Application: https://orcunsarmis.github.io/Movie-Search-API/
Github: https://github.com/orcunSarmis/Movie-Search-API

WEATHER DASHBOARD,

This weather dashboard features dynamically updated HTML and CSS, allowing users to see the weather forecast for multiple cities to help them plan for a trip.
Deployed Application: https://orcunsarmis.github.io/Weather-Dashboard/
Github: https://github.com/orcunSarmis/Weather-Dashboard

EXPERIENCE

2021 – TODAY
FAÇADE CARE MANAGER, GDP GROUP

BRISBANE, QLD

Management of a team of 12 rope access technicians, including training, relationship with clients, site management and work planning, reporting, quality and compliance. Demonstrating strong leadership, communication and time management skills to meet tight deadlines and clients' expectations. Attention to details and coaching capabilities guaranteeing my team's safety.

2012 – 2021
FAÇADE CARE SUPERVISOR, VARIOUS COMPANIES

PARIS, FRANCE / MELBOURNE, VIC

Façade care Supervisor in France and Australia within various companies.
Height safety, window cleaning, inspection & maintenance of iconic buildings (Eiffel Tower, Grand Palais, Eureka Tower, etc.). Ensuring height safety standards were met, mentoring and coaching, organising and supervising site projects to meet deadline and achieve high levels of client satisfaction. Using my background in mountaineering to obtain the highest level of qualification in the trade and becoming an IRATA Certified Level III Rope Access Supervisor.

EDUCATION
